

Are you tired of all your hard work getting ripped off!

“At Last, A-Stop-Them-Dead-In-Their-Tracks Method To Secure ALL Your Income From Your Online Product Sales!!”

Can you imagine this? You create a brand new product with the hope that the fruits of your sweat and long nights toiling over a hot keyboard will be met with financial gains. You spend a month creating a big product launch and finally the day arrives when you proudly release your product to the world!

You start to see the early sales come in and you feel a huge sense of accomplishment. The first day's sales exceed your expectations! Day 2 you see the sales surpass Day 1 and you are dancing around the room, “high 5-ing” everyone you see.

Day 3 you bounce out of bed log on to check sales and they are half of yesterday's total at this time? What gives? You have hits to your website! You are checking your stats when you get e-mail from a friend: “Dude, checkout this link that I found to a product that's just like yours.” You hit the link and it's your download page for your new product! You know, the one that customer's get AFTER they pay!!

ARRRGGGG! That's exactly what happened to ME! And I vowed to stop it once and for all. That's why I developed DLGuard, (DL is short for download).

Hi. My name is Sam Stephens. As a programmer and entrepreneur I have seen a lot of money lost by unscrupulous people that will use a “paid for” link to rip-off other people's hard work. It's not like in the “real” world when you just call the cops when someone breaks-in and steals something of yours. Who are you going to call when you see thieving of your product sales on your Internet site? It's up to us, the product creators and developers, to deter this ONCE and FOR ALL! DLGuard stops that thieving, dead in its tracks!

In fact I even tested it with a Dare...and a Reward.

We posted a direct link to our real download page on a very popular Internet marketing website, and told people they could have DLGuard for FREE if they could crack the security. Here's one of the many responses we received:

“When you put the download link for your software on a huge public marketing forum, to PROVE that your software can fully protect a digital product, I was totally blown away. Nobody is that stupid! But could anybody crack it... NO! Not a snowballs chance in hell. There was not a chance that anybody could get those products without paying for them. They were locked up tighter than Fort Knox.”

Paul Kleinmeulman - PrivateRights.com

Here's What DLGuard Does To Protect YOUR Income:

Secure Single Product Sales

Secure your digital products quickly and easily. DLGuard gives you a secure sales link that prevents people from skipping your credit card processing system. DLGuard will make sure a valid payment was made, and then pass your customer on to their secure download area and send them a custom download e-mail containing their link.

Secure Multiple Item Shopping Carts

If you sell e-books, software, downloadable music, and more, this is ideal for you! With DLGuard's built in shopping cart system you can offer your customers the choice of which products they would like to buy, allow them to add them to their shopping cart and then make one single payment for all their products.

Easy Membership Site Management

Do you provide a paid or free membership site? DLGuard is the perfect tool to easily manage your memberships. With automatic signups and removals, and protected download links within your membership area, creating a recurring sales website has never been easier!

Expiring Download Links

Stop download link sharing and thankyou/download page sharing with expiring download links. A great amount of download theft is made by people who share their download link after they buy your product! With DLGuard, your customers get a unique download link that expires after the amount of time you set.

Limit Download Attempts

With the ability to limit the number of download attempts allowed, you can STOP link sharing, dead in its tracks! So even if your download link or download page is posted in a public forum, the link will be automatically disabled after the download attempt limit that you set. And, download access can be reinstated quickly and easily if needed to resolve a customer service issue.

Auto Mail List Sign-up

DLGuard will automatically add your customers to your mailing list after a sale is made! No more manual submissions, no more annoying your customers by asking them to jump through fiery hoops. Its easy, instant, and invisible auto responder signup!

Here's what Developers, Information Marketers and Entrepreneurs say about DLGuard:

The last time I tried to implement a download management solution I gave up after page 42 of a huge complex manual. With DLGuard it was ridiculously easy to install and then to run.

Add to that Sam's superb customer support and constant innovation and it's an easy decision to purchase.

Harvey Segal

If you are looking for a great script to manage your downloads (including free downloads) I'd recommend you take a good close look at Sam Stephens Download Guard.

I have a custom system that's cost over \$100k to build (still under development) and I picked Sam's program to use until that system is out of beta. I can use my system now privately, but I chose to use Sam's instead. This should tell you the faith I have in Sam and his products.

He bends over backwards for his customers and goes the extra mile to make sure you're satisfied with your purchases.

David Christopher Ray,
"Mr. Unconventional" - www.MrUnconventional.com

As a full time Internet marketer I use a number of different payment processors and to find a product that allows me to incorporate them all for my product downloads has just been a real benefit.

DLGuard is an excellent product and provides excellent security and your support and continual product enhancement are great.

Quentin Brown

I market a number of products online and have been searching for a solution to digital theft.

It is so aggravating to have your downloads stolen by unscrupulous thieves. DLGuard is the perfect solution to protecting my products sold through Clickbank and Paypal.

You can't do without it!

Thank you.
